DIRECTIONS FOR USE: SITUATION

Indoors or outdoors around commercial, industrial and residential buildings including food handling establishments.

PEST

Snake and other reptiles.

RATE

Pour the mixture making a zig-zag path delimiting the area where you want to avoid the presence of snakes (1 L is enough for 15 linear metres). For best results, distribute the product every 15 days or after abundant rains.

CRITICAL COMMENTS

ECOTHOR ACTIVE NATURE NO MORE SNAKES is not food but it uses botanical oils to deter snakes by exploiting their sense of smell. The special formulation allows for slow release to provide a long-lasting and persistent barrier.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the product or used containers.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

FIRST AID

If poisoning occurs, contact a Doctor or hospital.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet which is available from Ensysstex on request.

NOTICE

Ensysstex warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under off-label permits not endorsed by Ensysstex, or under abnormal conditions.

SECTION 2
HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture

The product is NOT dangerous according to EC Regulation 1272/2008 (CLP).

Under normal conditions of use, the mixture does not cause adversely affect for man.

2.2. Label elements

Labelling according to the Reg. (CE) n. 1272/2008 (CLP):

Pictograms GHS:	
Warning:	
Danger indication:	
Safety advices:	P101 – If medical advice is needed, have product container or label at hand. P102 – Keep out of reach of children. P103 – Read label before use.
Further information:	EUH208 Contains: Pelargonium Graveolens flower oil (Egypt), Lavandula Hybrida Abrial herb oil. May cause an allergic reaction. EUH 210 Safety data sheet available on request.

2.3. Other hazards

The mixture contains perfumed substances, classified as skin sensitizers (main components: geranium essential oil, lavender essential oil) skin contact with the mixture or inhalation of the vapor /aerosol of the mixture can cause an allergic reaction in sensitive subjects.

The mixture does not contain substances identified as SVHC (Substances of Very High Concern) according to Regulation (EC) No. 1907/2006 (REACH), Article 59, paragraph 10.

The mixture does not meet the criteria for the identification of PBT or vPvB substances, in accordance with Annex XIII of the REACH Regulation.

According to the available data, the product does not contain PBT or vPvB substance in excess of 0.1%.

SECTION 3
COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances

Not relevant information.

3.2. Mixtures

Water-based preparation containing the following dangerous components:

SECTION 4 FIRST AID MEASURES

4.1. Description of first aid measures

In case of eyes contact: Wash carefully and thoroughly the eyes with plenty of water; consult a doctor if the disorder or irritation persists.

In case of skin contact: Wash the skin with water and soap.

In case of inhalation: In case of inhalation of large quantities of product, move the person into the open air, in a well-ventilated place; and consult a doctor if adverse symptoms are present.

In case of ingestion: Rinse the mouth. Do NOT induce vomiting. Contact a POISON CENTER or a physician, showing the safety data sheet.

4.2. Most important symptoms and effects, both acute and delayed

Repeated or prolonged contact with skin may cause reddening and skin dryness.
The mixture contains geranium essential oil, lavender essential oil, classified as skin sensitizers: skin contact with the mixture can cause an allergic reaction in sensitive subjects.

4.3. Indication of any immediate medical attention and special treatment needed

In case of accident or if you feel unwell, seek immediately medical advice (show the operation instructions or safety data sheet if possible)

SECTION 5 FIREFIGHTING MEASURES

5.1. Extinguishing media

Suitable means: use water, CO₂ fire extinguisher to extinguish the fire.
Unsuitable means: none.

5.2. Special hazards arising from the substance or mixture

The mixture is not combustible. In the event of fire, the mixture can evaporate, reducing the concentration of oxygen in the air.

5.3. Advice for fire fighters

GENERAL INFORMATIONS

	SAFETY DATA SHEET Reg. (CE) n. 1907/2006, (CE) n. 1272/2008 Reg. (EU) n. 918/2016	Edition 01 Revision 00 Date: 19/07/2018
	ECOTHOR oil-gel NO MORE SNAKES	

Cool containers with water jets to avoid product evaporation and the development of substances potentially hazardous to health. Always wear complete fire protection equipment. Collect extinguishing water that should not be discharged into drains. Dispose of contaminated water used for fire extinguishing and residues in accordance with current regulations.

EQUIPMENT

Normal fire fighting clothing such as Self-contained open-circuit compressed air breathing apparatus with full face mask (EN 137), Protective clothing for fire fighters (EN469), Protective gloves for fire fighters (EN 659) and boots for fire fighters (HO A29 or A30).

SECTION 6 ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

For those who intervene directly: block the loss if there is no danger.

Wear suitable protective equipment (including the individual protective equipment listed in Section 8 of the Safety Data Sheet) to prevent skin, eye and personal contamination. These instructions are valid for both workmen and emergency workers.

For those who do not intervene directly: make an emergency call.

6.2. Environmental precautions

Contain contaminated washing water and discard it.

Prevent product from entering sewers, surface water, groundwater.

Suitable material for collection: absorbent material, soil or sand.

6.3. Methods and material for containment and cleaning up

Use suitable absorbent materials (paper or fabric, etc.) and suitable containers to store the leaked material.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7 HANDLING AND STORAGE

7.1. Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace. Keep away from children. Keep away from food, drink and feed. When using, place on heat-resistant surfaces and away from combustible materials.

7.2. Conditions for safe storage, including any incompatibilities

The product is stable under normal temperature and pressure conditions. Store in a cool and dry place at temperatures not exceeding 40 °C away from sources of heat and direct sunlight.

7.3. Specific and use(s)

No data available

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

8.2. Exposure controls

The use of appropriate technical measures should always have priority over personal protection equipment; ensure good ventilation at the workplace by means of effective local suction.

When choosing personal protective equipment, ask your chemical suppliers if necessary.

Personal protective equipment must bear the CE marking attesting to their compliance with applicable regulations.

Provide emergency shower with eye face bowl.

Eye/face protection:	During normal product use no protective measures are required. In case of prolonged contact and handling of large quantities, wear protective goggles (UNI EN 166).
Hand protection:	During normal product use no protective measures are required. In case of prolonged or repeated contact with the skin and handling of large quantities, wear protective gloves (UNI EN 374).
Respiratory protection:	If the dust cannot be adequately controlled by suitable ventilation systems, wear respiratory protection devices, such as Respiratory mask with filter, valved filtering half masks to protect or self contained breathing apparatus (UNI EN 149, 140 o 136).
Environmental exposure controls:	Avoid the product reaching surface or groundwater.

SECTION 10 STABILITY AND REACTIVITY

10.1. Reactivity

The mixture is stable under normal temperature and pressure conditions.

10.2. Chemical stability

The mixture is stable under normal temperature and pressure conditions.

10.3. Possibility of hazardous reactions

None under normal conditions of use and storage.

10.4. Condition to avoid

Keep away from sources of heat or direct sunlight.

10.5. Incompatible materials

None known.

10.6. Hazardous decomposition products

None.

12.2. Persistence and degradability

According to the theoretical calculation of the composition of the concentrated product, the biodegradability is > 90% /28d. The biodegradability increases if the product is dilute.

12.3. Bioaccumulation potential

N.A.

12.4. Mobility in soil

Considering the chemical-physical characteristics of the product, the product is expected to have no mobility in the soil.

12.5. Results of PBT and vPvB assessment

Based on the available data, the product does not contain PBT or vPvB substances in excess of 0.1%.

SVHC (Substances of Very High Concern)

None

PBT (Persistent, Bioaccumulation and Toxic substance)

None

vPvB (Very Persistent and Very Bioaccumulation substance)
